Jonathan Chapman : Designers Visionaries and Other Stories: A Collection of Sustainable Design Essays before purchasing it in order to gage whether or not it would be worth my time, and all praised Designers Visionaries and Other Stories: A Collection of Sustainable Design Essays:

Designers, Visionaries and Other Stories unpacks the complex and crucial debates surrounding sustainable design to deliver a compelling manifesto for change, at a time of looming ecological crisis, mounting environmental legislation and limited progress. This is a book about sustainable design, by the leading sustainable design thinkers, for creative

practitioners, professionals, students and academics. This challenging work provides the reader with a rich resource of future visions, critical propositions, creative ideas and design strategies for working towards a sustainable tomorrow, today. The authors boldly present alternative understandings of sustainable design, to curate a challenging, sometimes uncomfortable and always provocative, collection of essays by some of the world's leading sustainable design thinkers. The result is an impacting and polemical anthology that reinvigorates the culture of critique that, in previous years, has empowered design with the qualities of social, environmental and economic revolution.

'Books like this one have such an important role to play.' John Thackara, Director, Doors of Perception 'These essays, by the most experienced design thinkers, help readers keep track of changes and hone their ability to prevent mankind from overheating.' Ed Van Hinte, author 'A rich and powerful collection of essays.' Aidan Rowe, University of Alberta, Canada ' ... these discussions will assist expert and novice alike to reposition themselves for the future in a relatively new and developing discipline.' Joan Farrer, Senior Research Tutor at the Royal College of Art, School of Fashion and Textiles, UK 'A great read for anyone interested in learning more about how designers can be proactive when it comes to sustainability.' DynamicGraphics, 2008. About the Author Jonathan Chapman and Nick Gant are co-directors of the Inheritable Futures Laboratory (IF:Laboratory) - a sustainable design research group at the University of Brighton, which generates practice-based research initiatives that aim to nurture greater flow of information between academia and industry. Jonathan is a senior lecturer in three dimensional design at the University of Brighton and founder of sustainable design and research company Safehouse Creative. Nick is the subject leader of the three dimensional design programme at the University of Brighton and director of award-winning design practice BoBo Design.
