Terence Coleman : Develop Your Financial IQ before purchasing it in order to gage whether or not it would be worth my time, and all praised Develop Your Financial IQ:

All these I have suggested will be the safest way you can start a new business. You are only spending a few hundred to a thousand dollars in start-up and education. A traditional business might be too risky for someone without any business experience. You invest tens of thousands of dollars and you might struggle trying to break even. But once you have developed the skills above, you will have a higher chance of succeeding. The most important thing of all besides a good learning attitude are the people you mix around with. It has been said before; you are the sum of the five people you spend the most time with! This is very hard to swallow but imagine if you start talking to your five beer drinking, poker buddies that you want to go out on your own and make a fortune, what would they tell you? They

would laugh their socks off before tearing your ego into a million pieces! At the heart of man lies jealousy. They don't want to see the people around them succeed. If you succeed, it makes them look bad. They know in their hearts that they are going no where yet they embrace that lifestyle and pull you down with them. They will steal your dream, and rob you of your financial freedom if you are not careful!
