Dave Chaffey, Fiona Ellis-Chadwick : Digital Marketing before purchasing it in order to gauge whether or not it would be worth my time, and all praised Digital Marketing:

14 of 14 people found the following review helpful. Not the best tool for learning e-marketing By Allison K. This book is required for an internet marketing class I am taking. I find it difficult to read. The authors are throwing so much information into each chapter that it is overwhelming and hard to absorb. I also feel that it does not follow a logical path, meaning that they reference other chapters and concepts not yet touched on almost constantly. Very often the other chapters referenced come later in the book so you haven't read them yet if you are going page/chapter order. I would not recommend this book for a student of e-marketing. Perhaps, if you already have experience in this field, you may find it useful, but as a teaching tool I feel it falls short. 1 of 1 people found the following review helpful. 'how to' version of this book that is better updated, with more directly relevant academic content would ... By Customer Overly dense and too mixed in terms of slightly shallow academic content and quickly outdated practical advice. It's way too

long and has too much in there. Chaffey really does seem to know his stuff, but a much simpler, 'how to' version of this book that is better updated, with more directly relevant academic content would be a better book. 0 of 0 people found the following review helpful. Five Stars By Colby Anne Thompson This book is precise and easy to read!!! Love it!!!

'I have used this book in all its editions since first publication with my undergraduate and postgraduate students. It is a core text for all the students, because it provides the detail they require at an academic level. Importantly it is a book for the practitioner to use too. This is why we use it on our postgraduate practitioner programmes ndash; where we actually buy the book for the students as we believe it is that important. No other text comes close and literally thousands of our graduates have benefitted from it in their subsequent careers: written by the specialist for the specialist.'
