This step-by-step guide on setting up own complementary health care practice, covers every aspect of starting up a

new practice, taking into account the wide range of practice requirements from the very simple (e.g. in therapist's own home) to the more ambitious (e.g. buying premises from which to set up a clinic). It addresses all the legal requirements, detailed and precise financial calculations, and the mechanics of how the therapist goes about making their vision a reality. Day-to-day aspects that need to be considered when the practice is up and running are covered. Gives clear advice on legal and financial requirements, the production of a marketing strategy and the presentation of the precise financial calculations required for a business plan, with worked examples. Includes detailed information on how to write a business plan, with a numerically linked example. Covers day-to-day aspects of running a practice. International in its approach, the book contains extensive lists of useful web addresses for access to up-to-the-minute information. Financial templates are supplied as appendices. The book offers key advice for all therapists - chiropractors, osteopaths, massage therapists and complementary therapists - and is suitable for undergraduates, newly qualified practitioners and experienced practitioners looking to either start up or develop and grow their practice.
