This book deals with the structural origins of economic and financial crises. It explains that both economic theories and policies need to be grounded on a monetary macroeconomic analysis of the working of domestic and international

economies. The volume outlines reform proposals to make sure that banking activities respect the nature of money.

About the Author Alvaro Cencini is Full Professor of Monetary Economics at the University of Lugano, Switzerland. He has a DPhil degree from the University of Fribourg and a PhD degree from the London School of Economics. He has collaborated with Bernard Schmitt for 44 years and is the author of several books and papers on quantum monetary macroeconomics.
