Thomas Wagner : Engines and fuels of the future in the automotive industry before purchasing it in order to gage whether or not it would be worth my time, and all praised Engines and fuels of the future in the automotive industry:

Seminar paper from the year 2007 in the subject Economy - Environment economics, grade: 1,3, University of Applied Sciences Constanze, course: Environment Economics, language: English, abstract: This essay is about the engines and fuels of the future in the automotive industry. It tries to find out whether these technologies are suitable for the purpose to reduce pollutant emissions. Furthermore, it will consider the potential of the engines/fuels which

they can contribute to an sustainable energy supply in the traffic sector, independent of the use of crude oil.
