Henry X Shi : Entrepreneurship in Family Business: Cases from China: 30 (International Studies in Entrepreneurship) before purchasing it in order to gage whether or not it would be worth my time, and all praised Entrepreneurship in Family Business: Cases from China: 30 (International Studies in Entrepreneurship):

This book presents an excellent analysis of how a family business is different from other forms of organization and especially its peculiarities in relation to entrepreneurship. Focusing on small and medium-sized second-generation Chinese family businesses this book provides an in-depth analysis on the relationship between the firm's family attributes or "familiness" as conceptualized in this book and entrepreneurial processes, which leads to different outcomes. Eight cases from China are presented in this book and a dual-level approach is proposed for research on entrepreneurship in family businesses, emphasizing both firm processes and the role of individual owner-managers. Readers will also find several useful policy and practice-oriented perspectives in this book.

From the Back Cover This book presents an excellent analysis of how a family business is different from other forms of organization and especially its peculiarities in relation to entrepreneurship. Focusing on small and medium-sized second-generation Chinese family businesses this book provides an in-depth analysis on the relationship between the firm's family attributes or "familiness" as conceptualized in this book and entrepreneurial processes, which leads to different outcomes.
