From Routledge : Internal Audit in Higher Education (Creating Success) before purchasing it in order to gage whether or not it would be worth my time, and all praised Internal Audit in Higher Education (Creating Success):

This volume describes a range of experiences of internal audit in higher education institutions from the UK, USA, Australia, New Zealand, South Africa and Germany. It presents approaches to best practice designed to enable readers

to assess and develop their own audit procedures.

"The primary focus of this book is on quality enhancement in higher education through program audit, self-review and teaching and learning assessment. Though pieces on traditional financial audit are included, this is not, as its title might suggest to some, simply a collection of essays describing financial audit techniques and experiences. The editors bring together in one volume a view of best practices in the United Kingdom, Germany, the United States, Australia and New Zealand. [They] commissioned contributions from a diverse group of experts carefully chosen to provide the reader with a broad understanding of quality assessment practices worldwide. This is a well-written book on a topic of current relevance worldwide. It ought to be required reading for all those embarking on quality assessment initiatives as well as those seeking to understand better why their current processes might not be achieving the level of success anticipated." -- Planning for Higher Education
