Giancarlo Gandolfo : International Trade Theory and Policy (Springer Texts in Business and Economics) before purchasing it in order to gauge whether or not it would be worth my time, and all praised International Trade Theory and Policy (Springer Texts in Business and Economics):

In the present text the author deals with both conventional and new approaches to trade theory and policy, treating all

important research topics in international economics and clarifying their mathematical intricacies. The textbook is intended for undergraduates, graduates and researchers alike. It addresses undergraduate students with extremely clear language and illustrations, making even the most complex trade models accessible. In the appendices, graduate students and researchers will find self-contained treatments in mathematical terms. The new edition has been thoroughly revised and updated to reflect the latest research on international trade.

From the Back Cover
With contributions by Federico Trionfetti
In the present text the author deals with both conventional and new approaches to trade theory and policy, treating all important research topics in international economics and clarifying their mathematical intricacies. The textbook is intended for undergraduates, graduates and researchers alike. It addresses undergraduate students with extremely clear language and illustrations, making even the most complex trade models accessible. In the appendices, graduate students and researchers will find self-contained treatments in mathematical terms. The new edition has been thoroughly revised and updated to reflect the latest research on international trade.
International Trade Theory and Policy is a masterful exposition of the core ideas of international trade. The book updates the classic monograph of Professor Gandolfo and is now the single most comprehensive and up-to-date book in the field. I highly recommend it for advanced undergraduates, PhD students, and professional economists. Even specialists in international trade will find new insights.
Professor Donald R. Davis, Kathryn and Shelby Cullom Davis Professor of Economics and International Affairs, Columbia University
This new edition of International Trade Theory and Policy continues the fine tradition set by Giancarlo Gandolfo with his first edition. This is a comprehensive and up to date textbook ideal for both undergraduate and graduate trade courses. This new edition includes the latest on globalization, economic geography as well as trade integration and wage inequality. It is an essential addition to any academics bookshelf and an important reference in any quality international trade course.
Professor Pasquale M. Sgro, Associate Dean Research, Faculty of Business and Law, Deakin University and Editor, Journal of International Trade and Economic Development
About the Author
Giancarlo Gandolfo has been Professor of International Economics at the University of Rome la Sapienza from 1974 to 2010, when he retired. Previously he taught Economics and Mathematical Economics at the Universities of Rome (1965-70) and Siena (1968-74). He has been visiting professor in various foreign universities. He is a member of the Accademia Nazionale dei Lincei, Rome, a research Fellow of CESifo, Munich, and holds a doctorate honoris causa from the University of Frankfurt. He is the author of over 180 publications and sits on the editorial board of several international journals. For details see his website <http://gandolfo.org>
Federico Trionfetti got the Laurea in Economics at La Sapienza University, Rome, and the Ph.D. at the Graduate Institute of International Studies, Geneva. He has held academic positions in the U.S. and the U.K., he spent a year as visiting scholar at Harvard University and two years as Marie Curie post-doctoral research fellow at the London School of Economics. Since 2002 he is Professor of economics in France, first at University of Paris 13 then at Aix-Marseille University.
