Passero III Met expectations. 36 of 42 people found the following review helpful. The Best of Journalistic Courage By Madsen tells the reader the intricate details on how the spider web is built then lets you decide if that web was built to catch prey or spun as a conversation piece. He is what journalists were in our grandparents time. His independence seems to harness the trust of honest people in the intel-politico world. He factually illustrates why George W. Bush has done more damage to America's international reputation than any president in history. The so called "suicides" he investigates is worth the price of the book.

This investigative account details how America's economic and intelligence associations with Saudi Arabia and Pakistan led to the devastating September 11 attacks and illustrates the role that private military companies are playing in George W. Bush's "new world order." Based on personal interviews, never-before-published classified documents, and extensive research, this examination details the criminal forces thought to rule the world today: the Bush cartel, Russian-Ukrainian-Israeli mafia, and Wahhabist Saudi terror financiers; revealing links between these groups and disastrous terrorist events.

About the Author Wayne Madsen is an investigative journalist and syndicated columnist whose articles have appeared in publications such as In These Times, The Miami Herald, and The Village Voice.
