By K. D. Cooper
I have now read this book for a second time, not only for enjoyment but to get more from it. The reviews of Paul Blustein's previous books printed on the cover from the giants of financial periodicals (Wall Street Journal, Financial Times The Economist) apply equally to this book. He exposes such apparently arcane subjects as WTO IMF to frightening (The Economist's word) life to the unsuspecting public. I am currently reading Blustein's book on the IMF, for a second time I can say the same about it.

A great read that somehow makes trade talks an interesting topic!
I would highly recommend this to anyone mildly interested in the world of trade and the WTO specifically.

As a linchpin of global capitalism, the World Trade Organization is both revered and reviled. In this book, financial journalist Paul Blustein tells the surprisingly entertaining and compelling story of how the WTO is sliding into dysfunctionality; which poses a new and grave menace to globalization itself. In more than seven years of global talks the WTO has struggled and failed to resolve contentious differences between rich and developing nations. Now, with a worldwide recession underway, the WTO's failure is contributing to a rise in protectionism; a sign that the world may not be so flat after all. Misadventures of the Most Favored Nations recounts, in vivid detail, how the highstakes negotiations went awry. At risk, Blustein argues, is the fate of the system that for six decades has opened the global economy and kept it from splintering.
