Lisa Disselkamp : No Boundaries: How to Use Time and Labor Management Technology to Win the Race for Profits and Productivity before purchasing it in order to gauge whether or not it would be worth my time, and all praised No Boundaries: How to Use Time and Labor Management Technology to Win the Race for Profits and Productivity:

1 of 1 people found the following review helpful. Outstanding InformationBy R RI have to say, I was prepared for the

typical dry business topic with bits of incredible information scattered throughout. Much to my surprise, every page I randomly opened to was packed with suggestions, ideas, examples, explanations and detail that wasn't bogged down with the latest industry buzzwords and terms. Written in an easy to understand format that reaches beginners and experienced professionals alike. This book is so easy to draw upon as a reference from start to finish, I was able to quickly pull together a "can't afford to pass-up" business proposal on Time and Labor Management implementation in far less time that I was prepared. 1 of 1 people found the following review helpful. Perfect Standard when Implementing a Timekeeping System By Beth Thompson This book was purchased for a college project. But I will keep this as my official guide when expanding a time keeping system. You can't go wrong following guidelines from the author of this book. 1 of 3 people found the following review helpful. Five Stars By HAPPYN AMAZON CUSTOMER Excellent read

An essential guide for putting workforce management systems to work for your business Showing you how to take your business from reactive to proactive and improve performance, No Boundaries provides a vendor-neutral guide on how your company can use workforce management systems to improve productivity and profits. Drawing upon years of experience implementing these systems, author Lisa Disselkamp offers numerous case studies illustrating how organizations have used workforce management systems to solve their business problems and discusses: How the latest software uses data from time and attendance to create real time visibility into employee activity and cost Developments in labor management technology that can mitigate the challenges faced by employers in every industry and public sector Using labor data to achieve financial goals and maximize profits Using workforce management technology to enhance operations, quality, compliance, and employee satisfaction and retention Adding value to data through integration with other key business information How to build a business case and gain internal support for an investment in time and labor management technology Guide to selecting and installing time and labor systems This book bridges the gap between what business leaders understand about their business and what they have yet to learn about this technology. The author introduces the concept of Mission Based Configuration, showing companies how to apply time and labor systems to their business needs to save time and money. The use of technology offers an effective tool to manage budgets, meet strategic targets, and channel decision-making toward best practices. No Boundaries reveals how your business can win the race for profits and productivity.

"Written for business managers and executives who need to labor costs, increase productivity and enforce accountability within their organizations, this guide to workforce management technology uses case studies to "demystify" the technologies used to implement these human captial systems." (Book News, August 2009) From the Inside Flap Technology should be saving you money and it should be an important tool your organization can count on to achieve its strategic, operational, and financial goals. So . . . is it? Showing you how to take your business from reactive to proactive in improving performance, No Boundaries reveals how your company can use workforce management technology (WMT) to boost productivity and profits and enforce accountability. Insightful and pragmatic, No Boundaries demystifies WMT, time labor management (TLM) technology, and human capital management (HCM). It sets the stage by explaining how technology has evolved in recent years and draws on case histories and existing WMT systems to illustrate what's working and how. In addition, it identifies critical issues to consider when moving into the acquisition, design, and planning stages of a WMT system. Author and labor technology expert Lisa Disselkamp reveals how to map a vision of success using the tools outlined in this book. You will learn: How time and attendance data can significantly enhance your visibility into labor trends within your organization Developments in labor management technology that can help you mitigate staffing, compliance, and financial challenges faced by business and industry today How to use labor data to achieve financial goals and maximize profits How to leverage workforce management technology to enhance operations, quality, and compliance Where to add value to data through collection, integration, and real-time distribution No Boundaries is a practical, step-by-step guide that will enable you to analyze your processes from end to end and break down labor management boundaries so that financial and operational executives will better understand how time and labor management technology can help maximize productivity and profits across the organization. From the Back Cover Praise for No Boundaries "There's no doubt employees are an expensive resource, yet many organizations still manage that resource with simple time clocks or worse, paper timesheets. This pragmatic guide examines not just how to control labor costs but how to tap the value hidden in workforce data to better manage your organization. If you're paying employees, you should read this book." — Ian Campbell, Chief Executive Officer, Nucleus Research, Inc. "This book provides a comprehensive road map to assist management in the navigation of effective labor management with the integration of labor practices, operation needs, technology, human behavior, and business requirements. In today's economic environment, this book is a must-read for management to maximize their most valuable asset—their human capital." — Katherine W. Gilchrist, SVP and Division CFO, Kindred Healthcare, Inc. "This is a must-read for anyone challenged to improve operational performance and reduce costs. It's a compelling combination of domain expertise and prescriptive guidance, with deep insight into the financial and cultural impacts of workforce

management technology. The author's writing style is eminently readable, making this a surprisingly effortless read." mdash;John Dyck, Chairman of the Board, MESA International; Global Director, Software Business Development, Rockwell Automation "No one knows more about workforce management technologies than Lisa Disselkamp, and no one does a better job of explaining the benefits and return on investmentmdash;in both time and moneymdash;where workforce management technologies are expertly selected and implemented. This book is a must-read for any organization contemplating an investment in these tools." mdash;Allan Schweyer, CEO, Human Capital Institute
