Theodore Panayotou, Peter Ashton : Not by Timber Alone: Economics And Ecology For Sustaining Tropical Forests before purchasing it in order to gage whether or not it would be worth my time, and all praised Not by Timber Alone: Economics And Ecology For Sustaining Tropical Forests:

Not by Timber Alone presents the findings of the Harvard Institute for International Development study, commissioned by the International Tropical Timber Organization, that examined the economic value of tropical hardwood forests as productive living systems and the potential for their multiple use management.

About the Author Theodore Panayotou is a fellow of the Harvard Institute of International Development (HIID) and lecturer in the Department of Economics at Harvard University. He is also a member of the Center for Tropical Forest Science. A specialist in environmental and resource economics, environmental policy analysis, and development economics, Dr. Panayotou has advised governments and institutes in Asia, Africa, and Eastern Europe as well as numerous other national and international institutions, on the interactions between the natural resource base and economic development. He received the 1991 Distinguished Achievement Award of the Society for Conservation Biology for his wide-ranging efforts to use economic analysis as a tool for conservation.
