Tahsin Hasan : OpenCart 1.4 Template Design Cookbook before purchasing it in order to gage whether or not it would be worth my time, and all praised OpenCart 1.4 Template Design Cookbook:

7 of 8 people found the following review helpful. Don't expect to design your own template with this book!By KenThe term cookbook in the title misleads you to believe that you may be baking your own OpenCart template. It should be more accurately titled "Embellishing Your Store Bought Cake". Practically the first third of the book covers setting up a LAMP stack and installing the OpenCart system. Not until page 63 does the author talk about creating a new theme. Then it is practically a cut paste of the default theme! The middle third of the book is about customizing the sites widgets/modules. While a good bit of knowledge it doesn't go into the whys of what code bits are where or how to reorder them. Once you get to the midpoint of the book the included information gets useful but it's more about OpenCart features and not making a template.

This hands-on guide cuts short the preamble and gets straight to the point with practical recipes instead of just theoretical learning. Each recipe is specifically tailored to fulfill your appetite for creating professional visually

stunning templates and themes for your OpenCart store. You may be the owner of an OpenCart web store or a designer working with OpenCart. If you want to customize OpenCart to unleash its enormous potential and elevate your store to the next level, this book is for you. You must have some experience with OpenCart and understand its basic features. You also need to know HTML and should be comfortable taking up some challenges in PHP and JavaScript programming.

About the Author Tahsin Hasan is a software engineer from Bangladesh. He passed the Zend Certification Examination on 09 August, 2009 and has become the seventeenth Zend Certified Engineer (ZCE) from Bangladesh. This is the top-most certification on PHP from Zend, the developer of this outstanding scripting language. He is a tech enthusiastic and always keeps himself well-equipped with latest technologies.
