**Bruce D. Epperson : Peddling Bicycles to America: The Rise of an Industry** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Peddling Bicycles to America: The Rise of an Industry:

This economic and technical history of the early American bicycle industry focuses on the crucial period from 1876 to the beginning of World War I. It looks particularly at the life and career of the industry's most significant personality during this era, Albert Augustus Pope. After becoming enamored with English high-wheeled bicycles during a visit to the Philadelphia World's Fair in 1876, Pope soon started paying Hartford, Connecticut's Weed Sewing Machine Company to make his own brand of high-wheeler, the 'Columbia', the first to be

manufactured in America in significant numbers. A decade later, Pope bought out that company, and ten years after that, Hartford's Park River was lined with five of Pope's factories. This book tells the story of the Pope Manufacturing Company's meteoric rise and fall and the growth of an industry around it.

"wealth of interesting material"--Technology and Culture.  
About the Author Bruce D. Epperson is a transportation planner and attorney. He has published technical works on various aspects of urban transportation planning (including bicycle use) for the Federal Highway Administration, the Transportation Research Board and the Institute of Transportation Engineers. Active with the International Cycle History Conference for over a decade, he has presented papers at conferences in the United States, Canada, the Netherlands, and Japan.
