Arthur C.Grunwald : Pictorial Communication In Virtual And Real Environments before purchasing it in order to gage whether or not it would be worth my time, and all praised Pictorial Communication In Virtual And Real Environments:

Based on the Conference on Spatial Displays and Spatial Instruments held at the Asilomar Conference Center in 1987,

this work focuses on the geometry of pictorial graphics for computers and the tools with which to control them.

About the Author Stephen Ellis is a senior researcher at the Afrika-Studiecentrum, Leiden University and co-editor of "African Affairs".
