Stijn Brouwer : Policy Entrepreneurs in Water Governance: Strategies for Change before purchasing it in order to gauge whether or not it would be worth my time, and all praised Policy Entrepreneurs in Water Governance: Strategies for Change:

This book analyses policy making processes at the micro-level and offers a unique insight into the fascinating world of policy entrepreneurs, elucidating their strategic modus operandi. The author identifies change strategies and explores the role of individuals in policy change processes. Readers will see how these highly talented and exceptional

bureaucrats are constantly on the alert for new opportunities and have the capacity to "sell" and "market" new ideas. Based on a uniquely comprehensive four-year study, entailing more than 60 in-depth interviews and an extensive survey of over 300 water policy entrepreneurs in the Netherlands, this book explores the different strategies that policy entrepreneurs employ. It identifies which conditions affect the policy entrepreneurs' selection of strategies and more importantly, it assesses the (contextual) effectiveness of these strategies. Although the context of the study makes this work directly relevant to those in the fields of water resources and environmental management, it delivers universally relevant conclusions on affecting policy change. In addition to the theoretical material that will appeal to scholars and students, this book highlights a series of concrete recommendations for practitioners on how to affect policy change, making it of interest to academics and decision makers in the broad areas of policy change, sustainability and water management.
