**Richard M. Locke, Rachel L. Wellhausen : Production in the Innovation Economy (MIT Press)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Production in the Innovation Economy (MIT Press):

0 of 0 people found the following review helpful. Four StarsBy Geraldo Vieira F JRVery useful even as service has been more and more traded.0 of 2 people found the following review helpful. Five StarsBy Alzir Antonio MahlaA excelent book.

Production in the Innovation Economy emerges from several years of interdisciplinary research at MIT on the links

between manufacturing and innovation in the United States and the world economy. Authors from political science, economics, business, employment and operations research, aeronautics and astronautics, and nuclear engineering come together to explore the extent to which manufacturing is key to an innovative and vibrant economy. Chapters include survey research on gaps in worker skill development and training; discussions of coproduction with Chinese firms and participation in complex manufacturing projects in China; analyses of constraints facing American start-up firms involved in manufacturing; proposals for a future of distributed manufacturing and a focus on product variety as a marker of innovation; and forecasts of powerful advanced manufacturing technologies on the horizon. The chapters show that although the global distribution of manufacturing is not an automatic loss for the United States, gains from the collocation of manufacturing and innovation have not disappeared. The book emphasizes public policy that encourages collocation through, for example, training programs, supplements to private capital, and interfirm cooperation in industry consortia. Such approaches can help the United States not only to maintain manufacturing capacity but also, crucially, to maximize its innovative potential. Contributors Joyce Lawrence, Richard K. Lester, Richard M. Locke, Florian Metzler, Jonas Nahm, Paul Osterman, Elisabeth B. Reynolds, Donald B. Rosenfeld, Hiram M. Samel, Sanjay E. Sarma, Edward S. Steinfeld, Andrew Weaver, Rachel L. Wellhausen, Olivier de Weck

About the Author Richard M. Locke is Class of 1992 Professor of Political Science at the Massachusetts Institute of Technology. Rachel L. Wellhausen is Assistant Professor of Government at the University of Texas at Austin.
