J. Michael Finger, Julio J. Nogues : Safeguards and Antidumping in Latin American Trade Liberalization (Trade and Development) before purchasing it in order to gage whether or not it would be worth my time, and all praised Safeguards and Antidumping in Latin American Trade Liberalization (Trade and Development):

Until the 1990s, the main users of safeguards and antidumping laws were Australia, Canada, the European Union, and the United States. Since then, many countries have implemented such laws, leading to a proliferation in antidumping and safeguard activity across the world. This timely book documents the political economy surrounding the implementation of these laws in seven Latin American countries and provides details on the institutions created, implementation of the laws, and subsequent activity. It finds that, in the larger political context, antidumping and safeguards are a necessary quid pro quo to certain important sectors to obtain much more liberalized trade policies for the general economy.

"These case studies reveal that careful management of the legal principles and domestic legal institutions can do much to reduce the protectionist bent of these instruments. The study will be of value to lawyers, economists, political scientists, and policymakers interested in the role of trade remedy measures in national trade policy." -- Alan O. Sykes
About the Author
AS BARACAT Professor Universidad de CEMA and formerly President, International Trade Commission of Argentina, Argentina
JOSEFINA CAMMINATI Attorney, Universidad Catoacuta;lica de Peruacuta; and formerly Consultant to the Legal Vice Ministerio Comercio, the Peruvian Exporters Association (ADEX), Peru
