As a journalist specializing in security, I carry Mr. Timm's book around in my briefcase and refer to it regularly.0 of 0 people found the following review helpful. A great reference book from an authority in school securityBy J. YangPaul Timm is a devoted school security professional with deep knowledge of the subject matter. He is also full of integrity and genuine concerns for this subject matter. I have heard him on the radio regarding school security and was awed by his knowledgeable and practical advice. This book not only covers the hardware security hardware matters, it illustrates strategies to influence behaviors of the parties involved. There is even a chapter to cover social media risks. Finally, people can acquire his knowledge through this well thought-out book. I highly recommend it to school administrators who wants to make

their learning environment safer in this more and more unsafe world. 0 of 0 people found the following review helpful. Paul Timm is an absolute expert in School Security. His ...By RoCoach Paul Timm is an absolute expert in School Security. His level of professionalism is a true testament to the value of this book. His book School Security How to build and strengthen a school safety program is a must for anyone who harbors children. I insist my children's school read this book.

It seems that every day there's a new story about a security lapse, emergency lock-down, or violent act taking place at a school somewhere in the United States. Today it's simply inexcusable not to have adequate security measures in place; regardless of how safe you think your community may be. In School Security, author Paul Timm, a nationally acclaimed school security expert, explains how to make your institution a safer place to learn with easy-to-follow steps. Throughout the book, Timm emphasizes a proactive rather than reactive approach to school security. Readers are introduced to basic loss prevention and safety concepts, including how to communicate safety information to students and staff, how to raise security awareness, and how to prepare for emergencies. The book discusses how to positively influence student behavior, lead staff training programs, and write sound security policies. An entire chapter is dedicated to describing what school security resources are available for follow-up reading and further training. School Security isn't just a book for security professionals: it helps people without formal security training—namely, educators and school administrators—effectively address school risk. Serves as a comprehensive guide for building an effective security program at little or no cost. Covers fundamental crime prevention concepts, making it suitable for both school security professionals and educators with no formal security training. Addresses the risks commonly facing school administrators today, from access control to social media. Takes a holistic approach to school security rather than focusing on a particular threat or event.

"...emphasizes detailed comprehensive planning for schools...provides an excellent exit interview checklist. Many forms useful in school mgmt. are provided. The importance of using social media in risk mitigation is discussed." -- Security Letter "...does a commendable job of walking the readers through several concepts and challenges, but also proposes an approach and techniques to overcome these challenges. The author...does a proficient job of sharing his vast knowledge." --Hakin9, Issue 01-15 "... could be used by anyone interested in this contemporary and challenging issue,...as the principles and concepts are explained in understandable terms using plain language and illuminating photographs." --Security Management (print and online), January 2015 "Timm, author of the upcoming book 'School Security: How to Build and Strengthen a School Safety Program,' believes the data is skewed because of underreporting of crimes by schools, which he says has been going on for years." --SecurityInfoWatch.com, June 2014 About the Author Paul Timm is a board-certified Physical Security Professional (PSP), president of RETA Security, Inc., and a nationally acclaimed expert in school security. In addition to conducting numerous vulnerability assessments and his frequent keynote addresses, Paul is an experienced School Crisis Assistance Team volunteer through the National Organization for Victims Assistance (NOVA). He holds a patent on a vulnerability assessment methodology known as ALPHA; and is certified in Vulnerability Assessment Methodology (VAM) through Sandia National Laboratories. He is a member of ASIS International, where he serves as vice chairman of the School Safety Security Council, and the Illinois Association of School Business Officials (IASBO), where he serves on the Risk Management Committee. Nearing the completion of his MDiv at Moody Theological Seminary, Paul holds a degree in Speech Communications and a Certificate in Business Administration from the University of Illinois.
